and back

400 PSI - 1200 PSI
ITEM #4JSW

Comparable units come with only half the
features and cost over \$800.00

This heavy duty wand is designed
specifically for the stone restoration
specialist to rinse slurry and abrasive
residue from the work area.

It is built to connect to a portable,
truck mount, or configured to
work with a pressure washer
and vacuum source of 400 -
1200 psi.

Unlike most wands, that
move in one direction and
can get sucked to the
floor, making them hard
to use, our wand glides
with ease in both
directions, thanks
to two wheels with
adjustable height.

Inline Filter
minimizes jet
clogging

Quick Disconnect
Hoses

Easy-To-Change Squeegee Blades
(front and rear blades)

Easy Access for Jet Removal

Solid Aluminum Head

The ULTIMATE rinse tool
for the serious stone
restoration craftsman.

**When you want only the
BEST tool available!**

The whole tool collapses and the head
comes off for easy transport or storage.
